## TAILORING INSTRUCTIONS (to take measurements)

FOR BODY MEASUREMENTS – Enter exact measurements of man, not of an old garment. Hold tape firmly, never loosely. If any measurements are abnormal, place "OK" beside measurement.

FOR COATS – Take all snug, not tight measurements over dress shirt.

FOR SLEEVES – Arms must not be bent, but straight down at sides and with coat off. Start the tape at the center of the back of the neck (*measure total cross shoulder distance and divide by two*) and pass the tape squarely over the top of the shoulder (*not to front or back*), then straight down the arm to the length desired. The length desired by most men is about one inch below the center of the wrist.

FOR TROUSERS – Take waist measurement over shirt, not top of trousers.

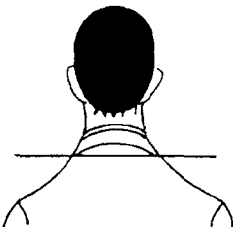

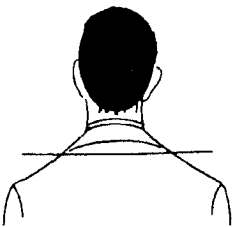

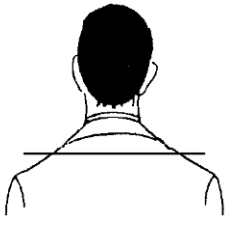

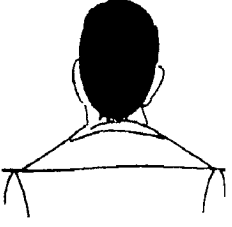

FOR GLOVES – Include an outline drawing both of the right and left hand with notations as to fitting problems such as short or long fingers, thick palms, etc.

FOR HATS OR CAPS – Measure across top of temple continuing in a straight line around head.

FOR WEIGHTLIFTERS – Measure shoulders, underarm to top of shoulder, biceps, and forearm.
